Task 3: Styles

Objective: Style your website!

1. Create a stylesheet and link it from your HTML file's `<head>`.
2. Style the text in your page with a font of your choosing.
3. Style the headings using tag selectors.
4. Give the content under your headings a class, then make the content *italic*.
5. Give an `id` to the list of links at the top of the page. Using CSS, add any combination of the following styles to the list:
   a. Make the text **bold**.
   b. Make the text *italic*.
   c. Change the *font* of the text.
   d. Change the color of the text.
6. Continue to style your website using CSS to make it look how you like it.
